

Laura Whitworth

Kindergarten Teacher

Home Church: First Baptist Church Maryville

Family: Married with three children

Personal Testimony:

When I was about 6 years old, I remember my mom becoming very active in our church. My mom had met the Lord, and she was so excited to share her faith with me. I was suffering from a chronic kidney disease, and I remember my mom asking for prayers of healing one evening at a Wednesday night prayer meeting. At my next doctor's visit, the doctor pronounced me HEALED! I was so amazed at the power of prayer and so astonished that Jesus hears and answers prayers. Right then I fell in love with Jesus. I wanted to commit my heart and life to a living and loving Lord. It has been exciting to see how God has used various circumstances in my life for His greater good. I feel very blessed to teach at Maryville Christian School. I love working in an academic environment that allows me to teach Godly principles to my students and allows me to help equip them build a relationship with God.

Goals for my classroom:

My goal is to provide is to provide a safe and fun learning environment for my students. I want the children to feel they are valued by God, their peers and by their teacher. I want to instill in them the desire to always try their best. There are so many different academic and social goals for a kindergarten classroom. But my main goal is that children will leave my classroom excited and prepared to begin the academic journey that lies ahead of them.
